Working Mother
(IT Professional)

Information

Name : Shruthi

Age: 34 years

Occupation: Working Mother (IT Professional)

Location: Chennai, India

About

Shruthi is a 34-year-old IT professional and mother of two from Chennai. She manages healthcare for her entire family, including her father who has diabetes. Between work and home, she has no time for long phone calls to clinics and worries about missed follow-ups. She needs one trusted place to book doctors and keep her family's health records organized.

Goals

- Book doctor appointments quickly, without waiting on phone calls.
- Keep all family medical records in one organized, accessible place.
- Get automatic reminders so no follow-up or medication is ever missed.

Frustrations / Pain Points

- Booking by phone means long holds and clinic-hours-only availability.
- Reports and prescriptions are scattered across files, emails, and WhatsApp

A Consultant Physician

Information

Name : Dr. Arul

Age: 45 years

Occupation: A Consultant Physician

Location: Chennai, India

About

Dr. Arul is a 45-year-old Consultant Physician who values efficient workflows, accurate patient records and seamless communication. He seeks reliable digital solutions that help him manage appointments, access medical histories and deliver better patient care.

Goals

- Provide accurate and timely patient care.
- Access patient records and medical histories quickly.
- Manage appointments and consultations efficiently.
- Communicate clearly with patients and staff.
- Reduce administrative work and improve productivity.

Frustrations / Pain Points

- Difficulty accessing patient records across different systems.
- Long waiting times and appointment scheduling conflicts.
- Excessive paperwork and repetitive data entry.
- Delays in receiving lab reports and medical updates.
